GitHub: NotNookie | LinkedIn | Itch.io

PROFESSIONAL SUMMARY

Fourth-year BS Information Technology student (expected graduation June–July 2027) who has been programming since Senior High School. Builds end-to-end web products with React, Node.js, and Laravel, backed by PostgreSQL and deployed on Vercel and Cloudflare. Currently leading a multi-tenant scholarship management platform as a capstone project. Also trained in SAP S/4HANA, and has placed in the top two of the school's Android hackathon in all four years. Seeking a full-stack or web developer role.

EDUCATION

STI College – Sta. Cruz Branch August 2023 – Present
Bachelor of Science in Information Technology | Currently 4th Year, 1st Semester (Capstone) – Expected June–July 2027

STI College – Sta. Cruz Branch Graduated July 2023
Senior High School – IT in Mobile App and Web Development (Programming started here)

TECHNICAL SKILLS

Languages: JavaScript, PHP, SQL, Java, Dart, Python, C#, HTML, CSS

Frontend: React, Flutter, Vite, Tailwind CSS, Bootstrap, React Router, TanStack Query/Table, Zustand, React Hook Form, Zod, Framer Motion

Backend & Data: Node.js, Laravel (Sanctum), REST APIs, PostgreSQL (Supabase), Role-Based Access Control, Multi-tenant architecture

Platforms & Tools: Cloudflare Pages/Workers, Vercel, Sentry, Git, GitHub, Android Studio, Godot Engine, Visual Studio, VS Code, Claude, Codex

Strengths: Full-stack ownership, working under tight deadlines, team leadership, presenting technical work, mentoring

Enterprise: SAP S/4HANA (SD, MM, PP, FI, CO modules)

PROJECTS

Iskolar: Scholarship Management Platform (Scholarship-MonoRepo) Capstone Project, 2026 – Present
Full-Stack Developer | React 19, Vite, Tailwind CSS v4, Laravel, PostgreSQL (Supabase), Cloudflare

- Sole full-stack developer in a team of five, owning the entire infrastructure (frontend, API, database, and deployment); also served as acting team lead when the group leader was absent.
- Building a multi-tenant platform that lets multiple municipalities run and manage their own scholarship programs and applicants, starting with the Municipality of Sta. Cruz, Laguna (LYDO).
- Structured as a monorepo with a React frontend and a Laravel API; authentication through Laravel Sanctum with role-separated student and admin areas.
- Built admin dashboards with sortable data tables, charts, and PDF report export; added Sentry for error monitoring and Brevo for transactional email.
- Deployed on Cloudflare Pages and Workers with a Supabase-hosted PostgreSQL database; co-presented and demoed the system with the team leader to a panel of faculty and IT experts.

Better Me Web betterme-web.vercel.app
Full-Stack Developer | Built for a real client (a family-run digital products business) | React, Vite, Node.js, Supabase, PayMongo

- Shipped a production digital-product storefront connecting React flows to serverless checkout APIs, automating payment-to-delivery.
- Added PayMongo checkout sessions with webhook idempotency and signed webhook verification, preventing duplicate fulfillment from repeated events.
- Secured paid download links with browser-bound token hashing; automated order states in Supabase and added real-time order polling on success pages.

Latia POS Academic Project

Full-Stack Developer | React, Flutter, Node.js, REST API, SQL, Role-Based Access Control

- Designed a multi-app POS system: a Flutter mobile cashier app, centralized backend, and admin management dashboard.
- Implemented cart processing, transaction recording, inventory deduction, and order history, with server-side validation and role-based cashier/admin permissions.

Knock the Count Down GMTK Game Jam 2026 | notnookie.itch.io/knock-the-count-down

Solo Developer | Godot Engine | Published on Itch.io

- Designed, built in Godot, and released a complete game within the game jam time limit and submitted it to GMTK Game Jam 2026.

Other Projects github.com/NotNookie

- **Java Swing Game:** Built a desktop game in Java Swing for the Object-Oriented Programming course, applying OOP design principles.
- **ResumeForge:** Built a project for testing Gemini API keys and AI-assisted resume generation.
- **Fuwa and Sillage:** Designed responsive React and Framer Motion storefront concepts with scroll-driven animations and reusable components.

COMPETITIONS

CodeFest – STI College Sta. Cruz Mobile App Hackathon Annual, 1st – 4th Year

Build a working Android app in 6–8 hours using only Android Studio and the Android/Java documentation (no internet search or AI)

- 1st Year – 1st Runner-up; 2nd Year – 2nd Runner-up; 3rd Year – 1st Runner-up; 4th Year – 1st Runner-up

LEADERSHIP & ACTIVITIES

Graphic Designer – Python Club, STI College Sta. Cruz 1 year

- Designed graphics for the college programming club for one year.

Peer Tutor – Java Fundamentals 6 sessions, 2 hours each

- Taught Java basics one-on-one to a first-year student across six sessions.

CERTIFICATIONS & TRAINING

SAP S/4HANA using Global Bike – Part II (Certificate of Participation) Jul 28 – Dec 12, 2025

SAP S/4HANA using Global Bike: SD, MM, PP, FI, CO modules (Certificate of Participation) Jan 20 – Jun 7, 2025

SAP x Accenture Student Career Talk Webinar (Certificate of Participation) Sept 26, 2025

SAP certificates conducted by STI College through SAP University Alliances.
