PROFESSIONAL SUMMARY

BS Information Technology student passionate about building end-to-end products, with experience developing modern React frontends, Node.js backends, REST APIs, and production-ready web applications. Curious about AI-powered software and eager to grow into a full-stack developer who understands both user experience and backend systems.

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, C#, HTML, CSS

Frameworks & Technologies: React, Astro, Node.js, Vite, Bootstrap, Tailwind CSS, Supabase, REST APIs, PayMongo

Tools: Visual Studio Code, Visual Studio, Git, GitHub, Codex, Claude, Vercel

PROJECTS

Better Me Web | Full-Stack Developer | betterme-web.vercel.app

Tech Stack: React, Vite, Node.js (Vercel Serverless Functions), Supabase, PayMongo

- Shipped a production-ready digital product storefront that connects React frontend flows to secure serverless checkout APIs, reducing manual order handling through automated payment-to-delivery processing.
- Increased payment reliability by implementing PayMongo checkout sessions plus webhook idempotency controls, eliminating duplicate fulfillment updates from repeated events.
- Strengthened transaction security with signed webhook verification and browser-bound token hashing, ensuring paid download links are exposed only to validated sessions.
- Automated order state transitions in Supabase (pending, paid, fulfilled-ready), improving fulfillment accuracy and post-checkout user experience.
- Optimized purchase completion UX by adding real-time order polling on success pages, allowing customers to access delivery links immediately after payment confirmation.

Fuwa | Front-End Developer | <https://fuwa-one.vercel.app>

Tech Stack: React, Tailwind CSS, Framer Motion

- Designed and developed a modern e-commerce storefront concept for a fictional clothing brand with a strong focus on clean UI and user experience.
- Built responsive pages including home, shop, product details, and brand story using reusable React components.
- Implemented smooth scrolling, scroll-triggered animations, and polished micro-interactions using Framer Motion.

Sillage | Front-End Developer | <https://sillage-gamma-six.vercel.app>

Tech Stack: React, Tailwind CSS, Framer Motion

- Designed and built a premium multi-page storefront concept for a fictional fragrance brand emphasizing elegant visual storytelling.
- Developed responsive layouts with animated page transitions, scroll-driven effects, and conversion-focused user interface design.
- Focused on modern frontend architecture, reusable components, and performance-conscious animations.
